Software Test Engineer
Capgemini

CAREER OBJECTIVE

To get an opportunity where I can make the best of my potential and contribute to the organizations growth where I can use my knowledge of software testing, technical skills like **Manual Testing** Using **Functional, Non-Functional, Sanity, Smoke, Retesting, Regression**, **API Testing**, **Database Testing, OOPS Concept**, **Automation Testing** using **Selenium** and **Java.**

PROFESSIONAL SYNOPSIS

- **Software Test Engineer** with **3+ Years** of experience in Software Testing, proficient on **Web Testing Applications** using Java with **Selenium WebDriver and playwright.** Strong in **SDLC, STLC,** Proficiency in **Agile Sprint**.
- Hands on Experience of different types of testing's like **Sanity**, **GUI, Functional Testing**, **Re-Testing, Regression Testing, Globalization** Testing and **Database** Testing**, Browser Compatibility** Testing**.**
- Hands on experience of handling **I frames**, **Mouse hover actions**, **Popups and List Box using Action Class and Select Class**.
- Experience in Scripts preparation using **Web Element locators** and execution within the **Hybrid Framework.**
- Experience in Build Management Tool which is **Maven** for the **Data Driven Framework**.
- **Automated all Functional** and **Regression** scenarios using Selenium WebDriver.
- Extensive exposure on **Selenium Locators** like ID, Name, Class name and **X-path.**
- Hands on experience of **CURD** & **API Testing** using **POSTMAN** tool.
- Experience in **Creating Mock Test** data for **System Testing, UAT, and regression testing**.
- Hands on with **Automation framework design** and **implementation** according to project structure.
- Involvement in **Test Execution**, **Result Analysing** and **defect reporting.**
- Extensive knowledge on **Selenium IDE**, **Jenkins, Maven** and **Postman**
- Performed **Tester activities** for manual as well as automation testing execute, maintain & enhance the existing new **Automation Test Suite.**
- Strong understanding of **OOPS concepts** & **Arrays**, **Collection**.
- Create and **Maintain Libraries** and **Object Repositories** for the **Automation Framework**.
- Knowledge of **Data driven Testing**, multiple browser testing and Parallel Test execution using **Selenium WebDriver and TestNG**.
- Monitored the **entire life cycle of defects**, from identification to resolution and closure, and collaborated with **Developers** to ensure timely fixes and verify the **Resolution of Defects**
- Hands on experience in end to end functional and regression testing of applications, including **Requirements Understanding**, test case and **Scenario Development**, test execution, **Results Analysis** and **Sign Off**.

TECHNICAL SKILLS

- Operating Systems : Windows 7,8,10,11
- Databases : MYSQL
- Programming / Web Technologies : Core Java
- API Testing : Postman
- Project Management Tool : JIRA, Git & GitHub
- Automation Testing Tool : Selenium, playwright
- Automation Framework : TestNG, BDD, POM, Maven, Cucumber

EMPLOYMENT DETAILS

Worked as **Test Automation Engineer / Manual Tester** with Capgemini **Sep 2022 to Jun 2026**

PROJECT DESCRIPTION

Project: univision
Project: bnl project

Testing Approach: Manual & Automation Testing

Roles and Responsibilities

- Involved in designing **Test Scenarios** and **Test Cases**.
- Hands on experience on **Data Base Testing** using **MYSQL**.
- Analysing the functional requirements of the client using the **Agile methodology**.
- Write clean, efficient, and reusable automation scripts using **Selenium WebDriver and Python**.
- Actively participated in **Peer Reviews** of Test scenarios and **Test scripts**.
- Performing **Functional Testing, Regression Testing** and **Re-Testing**.
- Documenting Test Cases and Collecting **Test Data** for Functional Testing.
- **Identify** and **report defects** within the systems and applications under test.
- Hands on experience on Comparing UI and **API response**.
- Actively worked on finding the **Defects**, communicating them to the assigned developers, logging and **Documenting Defects**, and deciding the severity and **Priority** based on the impact they were creating on an application
- Participate in all sprint activities including, **Daily Stand Ups**, **Grooming Session**, planning, **Requirements Gathering**, story writing, and solution design sessions.
- Creating **Test Batches**, Executing Test Cases and **Reporting Defects**.
- Conducted comprehensive reviews of **Test Scripts** developed by team members to ensure alignment with **Project Requirements** and comprehensive coverage.
- Implement **Page Object Model (POM)** for maintaining modular and scalable test scripts.
- Integrate **automated test scripts** with CI/CD tools like Jenkins, GitLab CI, or GitHub Actions for continuous testing.
- Monitored the entire **Life Cycle of Defects**, from identification to **Resolution** and **Closure**, and collaborated with developers to ensure **Timely Fixes** and verify the resolution of **Defects**.
- Write clean, efficient and reusable automation scripts using selenium WebDriver, playwright
- Knowledge in end to end functional and regression testing of applications, including requirements understanding, test case and **Scenario Development**, **Test Execution**, **Results Analysis** and **Sign Off**.

ACADEMIC DETAILS

- **Bachelor of Science (B.S.C) in Computer Science** from Aditya Degree College, Kakinada.

DECLARATION

I hereby declare that the above information provided by me is true to the best of my knowledge and may be subject to verification of any kind.
