

Lakshmi Sree Kella

Software Engineer QA

9390082224

kellalakshmisree@gmail.com

Bengaluru

SUMMARY

Software Development Engineer in Test (SDET) with 3+ years of experience in manual, API, and automation testing for web-based applications in Agile environments. Hands-on experience in building and maintaining UI automation frameworks using Playwright and Selenium, validating REST APIs, and integrating automated tests into CI/CD pipelines. Strong understanding of software testing principles, regression testing, backend validation using SQL, and quality engineering best practices. Experienced in collaborating closely with developers and product teams to identify quality risks early, improve testability, and deliver stable, high-quality releases in fast-paced environments.

SKILLS

Programming Languages: Java, JavaScript

Automation Testing: Playwright, Selenium WebDriver, UI Automation, Regression Automation

API & Backend Testing: Postman, REST API Testing, SOAP UI, SQL Validation

Frameworks & Methodologies: TestNG, POM, BDD, Cucumber, Hybrid Framework, Maven, Agile Scrum

CI/CD & Version Control: Jenkins, Git, GitHub

Testing Types: Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Integration Testing, System Testing, Exploratory Testing, End-to-End Testing

Database Testing: SQL, MySQL

Defect & Test Management Tools: Jira

Operating Systems: Windows

WORK EXPERIENCE

E-Commerce Web Application Automation Testing

QA Engineer

01/2024 - Present

Bengaluru

- **Technologies:** Selenium WebDriver, Java, TestNG, Maven, Jenkins, Git, Page Object Model (POM), Playwright, Maven

Project Description & Responsibilities:

- Automated Login, Search, Cart, Checkout, and Payment workflows using Playwright and Selenium.
- Developed reusable automation utilities and page components to improve test maintainability.
- Executed automated regression suites through Jenkins CI/CD pipelines.
- Performed cross-browser validation on Chrome, Firefox, and Edge.
- Reduced manual regression effort by automating repetitive test scenarios.

Banking Application Functional & Manual Testing

Manual Test Engineer

09/2022 - 12/2023

Bengaluru

- **Technologies:** Jira, SQL, Agile Methodology, Excel, Test Case Management, Postman

Project Description & Responsibilities:

- Performed functional and regression testing for banking modules including Account Management, Fund Transfer, Transaction Processing, and Loan Services.
- Validated business workflows and backend data using SQL queries.
- Created reusable test scenarios and detailed test cases aligned with business requirements and acceptance criteria.
- Conducted API validation testing using Postman.
- Supported release testing and production issue verification activities.

Professional Experience

Capgemini Technology Services — *Software Engineer QA*

Bangalore, India | Sep 2022 – Present

- Designed, developed, and maintained automated UI test scripts using Playwright and Selenium for critical business workflows.
- Automated regression and smoke test scenarios to support rapid and reliable product releases.
- Performed API testing using Postman by validating request/response payloads, authentication, headers, and status codes.
- Collaborated closely with developers and product teams to identify edge cases, clarify requirements, and improve product quality early in the development lifecycle.
- Integrated automated test execution into Jenkins CI/CD pipelines to support continuous testing and release validation.
- Executed end-to-end testing across web applications ensuring stability, functionality, and cross-browser compatibility.
- Performed backend data validation using SQL queries to verify application workflows and business logic.
- Identified quality risks proactively and worked with engineering teams to resolve issues before production deployment.
- Conducted functional, regression, smoke, sanity, and exploratory testing across multiple releases.
- Maintained reusable automation components and improved framework scalability using Page Object Model (POM) design principles.
- Logged, tracked, prioritized, and validated defects using Jira throughout the complete defect lifecycle.
- Participated actively in Agile Scrum ceremonies including sprint planning, backlog refinement, daily stand-ups, reviews, and retrospectives.
- Supported rapid release cycles by balancing automation coverage with lightweight manual testing when required.
- Contributed to improving testability, reliability, and QA best practices across the engineering workflow.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

Aditya Degree College Kakinada

Affiliated to Adikavi University Rajahmundry

Graduated: 2022

CERTIFICATIONS

-
- Selenium with Java – Automation Testing (Udemy, 2024)
 - REST API Testing with Postman (Udemy, 2024)
 - Microsoft Certified: Azure Fundamentals (AZ-900)
 - Microsoft Certified: Azure Administrator Associate (Az-104)
