

Lakshmi Sree Kella

Software Engineer QA

9390082224

kellalakshmisree@gmail.com Bengaluru

SUMMARY

QA Automation Engineer with 3+ years of experience in manual testing, automation testing, API testing, and database validation for enterprise web applications in Agile/Scrum environments. Strong expertise in Java, Selenium WebDriver, TestNG, Playwright, automation framework development, regression testing, smoke testing, and sanity testing. Hands-on experience in developing and maintaining automated test scripts, requirement traceability, REST API validation using Postman, SQL database testing, defect lifecycle management using JIRA, and CI/CD execution using Jenkins. Skilled in Page Object Model (POM), reusable automation frameworks, defect triaging, test planning, and cross-functional collaboration to deliver high-quality software releases in banking and enterprise domains.

SKILLS

Automation Testing : Selenium WebDriver, Selenium with Java, Playwright, UI Automation Testing, TestNG, JUnit (Basic Understanding), BDD Cucumber, Page Object Model (POM), Hybrid Framework, XPath, CSS Selectors, Maven

API Testing & Backend Validation : REST API Testing, Postman, SOAP UI, API Automation (Exposure), JSON/XML Validation, SQL, MySQL, Database Testing, Backend Data Validation

Testing Types : Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Compatibility Testing, Integration Testing, System Testing, User Acceptance Testing (UAT), End-to-End Testing, Exploratory Testing

DevOps & Version Control : Jenkins, CI/CD Pipeline, Git, GitHub, Bitbucket (Awareness)

Defect & Test Management : JIRA, Defect Tracking, Defect Triaging, Test Case Design, Requirement Traceability Matrix (RTM), Risk Analysis, Test Planning

Methodologies: Agile Scrum, SDLC, STLC

Programming Languages: Java, JavaScript, C

WORK EXPERIENCE

E-Commerce Web Application Automation Testing

QA Engineer

01/2024 - Present

Bengaluru

- **Technologies:** Selenium WebDriver, Java, TestNG, Maven, Jenkins, Git, Page Object Model (POM), Maven, cucumber

Project Description & Responsibilities:

- Developed and maintained automation test scripts using Selenium WebDriver with Java and TestNG for critical e-commerce modules including Login, Product Search, Cart, Checkout, and Payments.
- Designed and implemented a scalable automation framework using Selenium, Java, TestNG, and Page Object Model (POM) to improve automation maintainability.
- Created, executed, and maintained automation test suites for functional, regression, smoke, and sanity testing to ensure release quality.
- Integrated automation test execution with Jenkins CI/CD pipelines for continuous quality validation.
- Collaborated with developers, business analysts, and QA teams to analyze requirements, validate fixes, and improve product quality.
- Identified, logged, and tracked defects using JIRA, ensuring timely defect resolution and retesting.
- Improved automation coverage and reduced manual effort by automating repetitive business-critical workflows.

Banking Application Functional & Manual Testing

Manual Test Engineer

📅 09/2022 - 12/2023 📍 Bengaluru

- **Technologies:** Jira, SQL, Agile Methodology, Excel, Test Case Management, Postman

Project Description & Responsibilities:

- Performed manual and end-to-end testing for banking workflows based on business requirements and user stories.
- Created and maintained test scenarios, test cases, test plans, and QA documentation aligned with acceptance criteria.
- Conducted functional, integration, system, regression, and UAT testing to ensure release quality.
- Validated backend data using SQL queries and collaborated with developers to troubleshoot issues.
- Performed functional and end-to-end testing for banking workflows including Account Management, Fund Transfer, Loan Processing, and Transactions.
- Validated business-critical workflows, ensuring compliance with functional requirements and quality standards.

Professional Experience

Capgemini Technology Services — *Software Engineer QA*

Bangalore, India | Sep 2022 – Present

Prepared, maintained, and executed test cases based on business requirements, user stories, and functional specifications, ensuring end-to-end quality coverage.

Developed and maintained automated test scripts using Selenium WebDriver, Java, TestNG, and Playwright for enterprise web applications.

Maintained traceability from requirements to test cases and automation scripts, ensuring complete testing coverage and release readiness.

Executed functional, regression, smoke, sanity, integration, compatibility, and UAT testing across multiple releases.

Conducted REST API testing using Postman, validating request payloads, response schemas, headers, and business workflows.

Performed database validation using SQL queries to ensure backend data consistency and business rule compliance.

Used JIRA for defect tracking, defect triaging, defect status reporting, and issue resolution coordination.

Executed automation suites through Jenkins CI/CD pipelines to support continuous delivery and improve release confidence.

Collaborated with developers, business analysts, and product stakeholders in Agile/Scrum ceremonies, including sprint planning, stand-ups, retrospectives, and defect triage meetings.

Contributed reusable automation components using Page Object Model (POM) to improve maintainability and framework scalability.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

Aditya Degree College Kakinada

Affiliated to Adikavi University Rajahmundry

Graduated: 2022

CERTIFICATIONS

- Selenium with Java – Automation Testing (Udemy, 2024)
- REST API Testing with Postman (Udemy, 2024)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft Certified: Azure Administrator Associate (AZ-104)
