

Lakshmi Sree Kella

Software Engineer QA

9390082224

kellalakshmisree@gmail.com Bengaluru

SUMMARY

QA Engineer with 3+ years of experience in manual testing, web application testing, API validation, and regression testing in Agile/Scrum environments. Strong understanding of SDLC, STLC, defect lifecycle management, test case design, and end-to-end business workflow validation. Hands-on experience in creating and executing functional, regression, smoke, sanity, and exploratory test scenarios, identifying defects, performing root cause analysis, and collaborating with developers to ensure high-quality software releases. Proficient in JIRA, test documentation, requirement analysis, release validation, and cross-functional collaboration.

SKILLS

QA & Manual Testing: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Exploratory Testing, End-to-End Testing, Integration Testing, User Acceptance Testing (UAT), Requirement Analysis, Root Cause Analysis, Defect Verification

Web & Mobile Testing: Web Application Testing, Cross-Browser Testing, UI Validation, Responsive Testing

Defect & Test Management: JIRA, Bug Tracking, Defect Lifecycle Management, Defect Reporting, Test Case Design, Test Scenario Design, Test Data Preparation, QA Documentation, Release Validation

API & Backend Validation: Postman, REST API Testing, SQL, Database Validation

Methodologies: SDLC, STLC, Agile Scrum

Tools & Version Control: Git, GitHub, Jenkins (Basic Exposure)

Programming: Java, JavaScript (Basic)

WORK EXPERIENCE

E-Commerce Web Application Automation Testing

QA Engineer

01/2024 - Present

Bengaluru

- Technologies:** Selenium WebDriver, Java, TestNG, Maven, Jenkins, Git, Page Object Model (POM), Maven, cucumber

Project Description & Responsibilities:

- Developed and maintained automation test scripts using Selenium WebDriver with Java and TestNG for critical e-commerce modules including Login, Product Search, Cart, Checkout, and Payments.
- Designed and implemented a scalable automation framework using Selenium, Java, TestNG, and Page Object Model (POM) to improve automation maintainability.
- Created, executed, and maintained automation test suites for functional, regression, smoke, and sanity testing to ensure release quality.
- Integrated automation test execution with Jenkins CI/CD pipelines for continuous quality validation.
- Collaborated with developers, business analysts, and QA teams to analyze requirements, validate fixes, and improve product quality.
- Identified, logged, and tracked defects using JIRA, ensuring timely defect resolution and retesting.
- Improved automation coverage and reduced manual effort by automating repetitive business-critical workflows.

Banking Application Functional & Manual Testing

Manual Test Engineer

09/2022 - 12/2023 Bengaluru

- **Technologies:** Jira, SQL, Agile Methodology, Excel, Test Case Management, Postman

Project Description & Responsibilities:

- Performed manual and end-to-end testing for banking workflows based on business requirements and user stories.
- Created and maintained test scenarios, test cases, test plans, and QA documentation aligned with acceptance criteria.
- Conducted functional, integration, system, regression, and UAT testing to ensure release quality.
- Validated backend data using SQL queries and collaborated with developers to troubleshoot issues.
- Performed functional and end-to-end testing for banking workflows including Account Management, Fund Transfer, Loan Processing, and Transactions.
- Validated business-critical workflows, ensuring compliance with functional requirements and quality standards.
- Executed manual functional and regression testing for banking workflows and customer-facing features.
- Created and maintained test cases, test scenarios, and test documentation based on business requirements.
- Conducted end-to-end workflow testing to validate user journeys and business logic.
- Used SQL queries for backend validation and collaborated with developers to resolve issues.

Professional Experience

Capgemini Technology Services — *Software Engineer QA*

Bangalore, India | Sep 2022 – Present

- Performed manual testing for web applications, validating new and existing features to ensure product quality and business requirement compliance.
- Designed, executed, and maintained test cases, test scenarios, and test data based on user stories and acceptance criteria.
- Conducted functional, regression, smoke, sanity, exploratory, and end-to-end testing for enterprise applications.
- Identified, logged, tracked, and verified defects using JIRA, collaborating closely with developers to ensure issue resolution.
- Performed root cause analysis for defects and validated bug fixes during regression cycles.
- Participated in release validation and sprint testing activities, ensuring stable deployments.
- Reviewed requirements and functional specifications to ensure adequate testing coverage.
- Collaborated with Engineering, Product, and Business teams to improve product quality and testing efficiency.
- Maintained accurate QA documentation, execution reports, and defect reports.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

Aditya Degree College Kakinada

Affiliated to Adikavi University Rajahmundry

Graduated: 2022

CERTIFICATIONS

-
- Selenium with Java – Automation Testing (Udemy, 2024)
 - REST API Testing with Postman (Udemy, 2024)
 - Microsoft Certified: Azure Fundamentals (AZ-900)
 - Microsoft Certified: Azure Administrator Associate (Az-104)
