

Lakshmi Sree Kella

Software Engineer QA

9390082224

kellalakshmisree@gmail.com Bengaluru

SUMMARY

QA Engineer with 3+ years of experience in software quality assurance, manual testing, web UI testing, API validation, and regression testing across enterprise applications. Strong expertise in test planning, test case design, defect lifecycle management, root cause analysis, and release validation in Agile/Scrum environments. Hands-on experience in functional, system integration, regression, smoke, sanity, and user acceptance testing, along with REST API testing using Postman and backend validation using SQL. Skilled in JIRA, SDLC, STLC, bug reproduction, troubleshooting, and collaborating with cross-functional engineering and product teams to deliver high-quality software releases.

SKILLS

QA & Testing: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, System Integration Testing, User Acceptance Testing (UAT), End-to-End Testing, Production Deployment Testing, Requirement Validation, Defect Reproduction, Root Cause Analysis

Web & API Testing: Web UI Testing, Cross-Browser Testing, REST API Testing, Postman, JSON Validation, API Validation

Database Testing : SQL, Database Validation, Data Verification, Query Validation

Bug Tracking & Collaboration: JIRA, Bug Tracking, Defect Lifecycle Management, Defect Reporting, Agile Scrum, Sprint Planning

Tools & Version Control: Git, GitHub, Jenkins (Basic), Browser DevTools

Methodologies: SDLC, STLC, Agile Development, Scrum

Programming: Java, JavaScript (Basic)

WORK EXPERIENCE

E-Commerce Web Application Automation Testing

QA Engineer

📅 01/2024 - Present

📍 Bengaluru

- **Technologies:** Selenium WebDriver, Java, TestNG, Maven, Jenkins, Git, Page Object Model (POM), Maven, cucumber

Project Description & Responsibilities:

- Developed and maintained automation test scripts using Selenium WebDriver with Java and TestNG for critical e-commerce modules including Login, Product Search, Cart, Checkout, and Payments.
- Designed and implemented a scalable automation framework using Selenium, Java, TestNG, and Page Object Model (POM) to improve automation maintainability.
- Created, executed, and maintained automation test suites for functional, regression, smoke, and sanity testing to ensure release quality.
- Integrated automation test execution with Jenkins CI/CD pipelines for continuous quality validation.
- Collaborated with developers, business analysts, and QA teams to analyze requirements, validate fixes, and improve product quality.
- Identified, logged, and tracked defects using JIRA, ensuring timely defect resolution and retesting.
- Improved automation coverage and reduced manual effort by automating repetitive business-critical workflows.

Banking Application Functional & Manual Testing

Manual Test Engineer

📅 09/2022 - 12/2023 📍 Bengaluru

- **Technologies:** Jira, SQL, Agile Methodology, Excel, Test Case Management, Postman

Project Description & Responsibilities:

- Performed manual and end-to-end testing for banking workflows based on business requirements and user stories.
- Created and maintained test scenarios, test cases, test plans, and QA documentation aligned with acceptance criteria.
- Conducted functional, integration, system, regression, and UAT testing to ensure release quality.
- Validated backend data using SQL queries and collaborated with developers to troubleshoot issues.
- Performed functional and end-to-end testing for banking workflows including Account Management, Fund Transfer, Loan Processing, and Transactions.
- Validated business-critical workflows, ensuring compliance with functional requirements and quality standards.
- Executed manual and exploratory testing for banking workflows involving transactions, account management, and loan processing.
- Created test plans, test scenarios, and regression packs ensuring complete functional coverage.
- Conducted API validations and backend database verification using SQL queries to ensure business data consistency.
- Collaborated with developers to reproduce issues, validate fixes, and improve release quality.

Professional Experience

Capgemini Technology Services — *Software Engineer QA*

Bangalore, India | Sep 2022 – Present

- Participated in the complete software testing lifecycle, from requirement review through release validation and post-deployment verification.
- Designed, created, and executed comprehensive test plans, test scenarios, and test cases for enterprise web applications.
- Performed functional, system integration, regression, smoke, sanity, and user acceptance testing (UAT) to ensure software quality and business compliance.
- Conducted web UI testing and cross-browser validation to ensure consistent user experience across platforms.
- Reproduced production defects, performed root cause analysis, and collaborated with developers to validate fixes.
- Executed REST API testing using Postman and performed backend validation using SQL queries.
- Logged, tracked, prioritized, and verified defects using JIRA, ensuring timely issue resolution.
- Collaborated with Engineering, Product, and QA teams in Agile/Scrum ceremonies including sprint planning, stand-ups, reviews, and retrospectives.
- Maintained test documentation, execution reports, defect reports, and QA artifacts.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

Aditya Degree College Kakinada

Affiliated to Adikavi University Rajahmundry

Graduated: 2022

CERTIFICATIONS

-
- Selenium with Java – Automation Testing (Udemy, 2024)
 - REST API Testing with Postman (Udemy, 2024)
 - Microsoft Certified: Azure Fundamentals (AZ-900)
 - Microsoft Certified: Azure Administrator Associate (Az-104)
