

Lakshmi Sree Kella

Software Engineer QA

9390082224

kellalakshmisree@gmail.com Bengaluru

SUMMARY

Results-driven QA Automation Engineer with 3+ years of experience in Manual, API, and Automation Testing for web and enterprise applications in Agile environments. Strong expertise in Selenium WebDriver, Java, TestNG, Playwright, API Testing, SQL, Jenkins, Maven, and CI/CD processes. Experienced in designing automation frameworks, executing regression and functional testing, troubleshooting application issues, and collaborating with cross-functional teams to ensure high-quality software delivery. Skilled in defect management, analytical problem-solving, and continuous improvement of testing processes. Proven ability to contribute effectively to team discussions, support junior team members, and deliver stable and scalable automation solutions.

SKILLS

QA Testing Skills:

Automation Testing: Selenium WebDriver, Playwright(Basic), TestNG, Cucumber BDD, Page Object Model (POM), Hybrid Framework, Data-Driven Framework, Maven, Cross-Browser Testing, Manual Testing, Smoke Testing, Regression Testing, Sanity Testing, Functional Testing

Programming Languages: Core Java, JavaScript, C

API Testing: Postman, REST Assured(Basic), SOAP UI(Basic), REST API Testing, JSON Validation

Database Testing : SQL, MySQL

CI/CD & Version Control: Jenkins, Git, GitHub

Test Management & Methodologies : Agile Scrum, SDLC, STLC, JIRA, Defect Lifecycle Management

Additional Skills: XPath & CSS Selectors, Dynamic Web Element Handling, Root Cause Analysis, Defect Tracking, Troubleshooting, Analytical Problem Solving, Test Case Design, Team Collaboration, Knowledge Sharing

WORK EXPERIENCE

E-Commerce Web Application Automation Testing

QA Engineer

01/2024 - Present

Bengaluru

- **Technologies:** Selenium WebDriver, Java, TestNG, Maven, Git, POM

Project Description & Responsibilities:

- Developed and maintained Selenium automation scripts using Java and TestNG.
- Designed scalable automation framework using Page Object Model (POM).
- Automated critical regression test scenarios for Login, Search, Cart, Checkout, and Payment modules.
- Executed regression, smoke, and sanity test suites using Jenkins CI/CD pipelines.
- Performed cross-browser testing to ensure compatibility across multiple browsers.
- Integrated Maven for build management and dependency handling.
- Used Git and GitHub for source code management and version control.
- Collaborated with developers and business analysts to identify defects and validate fixes. Reduced manual testing effort significantly by automating repetitive test scenarios.
- Generated detailed execution reports and shared testing status with stakeholders.
- Participated actively in Agile ceremonies and team discussions. Troubleshot automation failures and optimized script stability for better execution reliability.

Banking Application Functional & Manual Testing

Manual Test Engineer

📅 09/2022 - 12/2023 📍 Bengaluru

- **Technologies:** Jira, SQL, Agile Methodology, Excel, Test Case Management, Postman

Project Description & Responsibilities:

- Analyzed business requirements and prepared detailed test scenarios and test cases.
- Performed Functional, Regression, Integration, System, and User Acceptance Testing (UAT).
- Validated end-to-end banking workflows including account creation, transaction processing, and loan approvals.
- Conducted backend database validation using SQL queries.
- Logged and tracked defects using JIRA and coordinated with developers for issue resolution.
- Performed API validation testing using Postman for banking service integrations.
- Participated in requirement review meetings and sprint discussions.
- Ensured test coverage for all critical business functionalities and edge-case scenarios.
- Prepared daily and weekly status reports for stakeholders.
- Supported production defect validation and retesting activities. Contributed to process improvement discussions and knowledge-sharing sessions.

Professional Experience

Capgemini Technology Services — *Software Engineer QA*

Bangalore, India | Sep 2022 – Present

- Executed 5000+ manual and automation test cases for enterprise web applications, identifying critical defects and reducing production issues.
- Developed and maintained automation test scripts using Selenium WebDriver with Java and TestNG.
- Built reusable automation components using Page Object Model (POM) and Hybrid Framework design patterns.
- Performed UI automation testing using Playwright with JavaScript for critical business workflows. Conducted Functional, Regression, Smoke, Sanity, Integration, and User Acceptance Testing (UAT).
- Collaborated with developers, business analysts, and operations teams to troubleshoot complex application issues and validate fixes.
- Participated actively in Agile sprint planning, daily stand-ups, sprint reviews, retrospectives, and defect triage meetings.
- Conducted REST API testing using Postman and validated request/response payloads, headers, parameters, and status codes.
- Performed backend database validation using SQL queries to ensure data consistency and business rule compliance.
- Executed cross-browser testing across Chrome, Firefox, and Edge browsers. Integrated automation execution with Jenkins CI/CD pipelines for continuous testing.
- Logged, tracked, and managed defects using JIRA throughout the defect lifecycle.
- Assisted in continuous improvement of automation frameworks and testing processes to enhance execution efficiency.
- Prepared test execution reports, defect metrics, and quality dashboards for release readiness.
- Supported junior team members by sharing automation framework knowledge and troubleshooting guidance.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

Aditya Degree College Kakinada

Affiliated to Adikavi University Rajahmundry

Graduated: 2022

CERTIFICATIONS

-
- Selenium with Java – Automation Testing (Udemy, 2024)
 - REST API Testing with Postman (Udemy, 2024)
 - Microsoft Certified: Azure Fundamentals (AZ-900). Microsoft Certified: Azure Administrator Associate (AZ-104)
