

Lakshmi Sree Kella

Software Engineer QA

9390082224

kellalakshmisree@gmail.com Bengaluru

SUMMARY

Results-driven QA Automation Engineer with 3+ years of experience in Manual, API, and Automation Testing for web-based applications in Agile environments. Skilled in Selenium WebDriver, Java, TestNG, Playwright, Postman, SQL, and CI/CD tools. Experienced in designing and executing automated test scripts, defect analysis, regression testing, and validating complex business workflows. Strong analytical and troubleshooting skills with proven ability to collaborate with cross-functional teams, support continuous process improvements, and contribute effectively to team discussions and quality initiatives.

SKILLS

QA Testing Skills:

- **Automation Testing:** Selenium WebDriver, Playwright, TestNG, Cucumber BDD, POM, Hybrid Framework, Maven
- **Programming Languages:** Java, JavaScript, C
- **API Testing:** Postman, SOAP UI, REST API Testing
- **CI/CD & Version Control:** Jenkins, Git, GitHub
- **Database Testing:** SQL, MySQL
- **Test Management Tools:** JIRA
- **Testing Types:** Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Integration Testing, UAT
- **Methodologies:** Agile Scrum, SDLC, STLC
- **Other Skills:** Defect Management, Cross-Browser Testing, Analytical Troubleshooting, Test Case Design, Root Cause Analysis

WORK EXPERIENCE

E-Commerce Web Application Automation Testing

QA Engineer

01/2024 - Present

Bengaluru

- **Technologies:** Selenium WebDriver, Java, TestNG, Maven, Git, POM

Project Description & Responsibilities:

- Designed automation frameworks using Selenium WebDriver with Java and TestNG following Page Object Model (POM) architecture to improve maintainability and reusability.
- Performed requirement analysis, impact assessment, test planning, and end-to-end functional validation for new feature enhancements and production releases.
- Participated in Agile sprint ceremonies including sprint planning, daily stand-ups, retrospectives, and defect triage meetings.
- Contributed to reusable utility methods and reporting enhancements to improve automation execution and debugging efficiency.
- Reduced manual regression effort significantly by automating repetitive business-critical scenarios.
- Collaborated with cross-functional teams including developers, business analysts, and operations teams to troubleshoot complex application issues and validate fixes.
- Participated actively in sprint discussions, defect triage meetings, and team knowledge-sharing sessions to improve testing efficiency and release quality.
- Assisted in continuous improvement of automation frameworks and testing processes to enhance execution stability and reduce manual effort.

Supported junior team members by sharing automation best practices, framework usage guidance, and troubleshooting techniques.

Banking Application Functional & Manual Testing

Manual Test Engineer

📅 09/2022 - 12/2023 📍 Bengaluru

- **Technologies:** Jira, SQL, Agile Methodology, Excel, Test Case Management, Postman

Project Description & Responsibilities:

- Performed end-to-end functional testing for banking applications involving Account Management, Fund Transfer, Loan Processing, and Transaction modules.
- Analyzed business requirements and prepared detailed test scenarios, test cases, test data, and traceability coverage for application changes.
- Executed Functional, Integration, Regression, System, and User Acceptance Testing (UAT) for multiple releases in Agile sprint cycles.
- Conducted REST API testing using Postman to validate request/response payloads, headers, status codes, and backend integrations.
- Performed backend database validation using SQL queries to ensure data consistency and transaction accuracy.
- Logged, tracked, and managed defects using JIRA and coordinated closely with development teams for defect resolution and retesting.
- Worked on validating asynchronous transaction processing workflows and backend message-driven operations.
- Participated in release validation activities and collaborated with cross-functional teams to ensure production readiness and application stability.
- Prepared test execution reports, defect metrics, and QA status reports for stakeholders.

Professional Experience

Capgemini Technology Services — *Software Engineer QA*

Bangalore, India | Sep 2022 – Present

- Executed system testing, manual testing, and automation testing for web and banking-related applications against business and technical requirements.
- Designed and executed test cases, test plans, regression suites, and acceptance criteria validation for software releases.
- Performed functional, regression, smoke, integration, and system testing to ensure solution quality and compliance.
- Developed and executed automated test scripts using Selenium WebDriver for regression testing and reusable workflows.
- Conducted API testing using Postman validating REST APIs, JSON/XML payloads, request parameters, and response codes.
- Performed backend data validation using SQL to ensure data consistency and business rule compliance.
- Logged, tracked, and resolved defects using Jira, collaborating closely with developers and stakeholders.
- Participated in Agile ceremonies including sprint planning, stand-ups, retrospectives, and defect triage discussions.
- Maintained test execution reports, QA documentation, defect metrics, and test artifacts.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

Aditya Degree College Kakinada

Affiliated to Adikavi University Rajahmundry

Graduated: 2022

CERTIFICATIONS

-
- Selenium with Java – Automation Testing (Udemy, 2024)
 - REST API Testing with Postman (Udemy, 2024)
 - Microsoft Certified: Azure Fundamentals (AZ-900)
 - Microsoft Certified: Azure Administrator Associate (Az-104)
