Professional Summary

Manual, API, and Automation QA Engineer with 3 years of experience testing web and API-based applications in Agile environments. Strong expertise in manual testing, test case design, defect management, API testing, and SQL validation, with hands-on experience in UI automation using Playwright. Experienced in building and executing test scripts for regression testing, improving test efficiency, and ensuring high-quality releases through close collaboration with developers and stakeholders.

Core Skills:

Manual Testing:

- Functional Testing, Regression Testing, System Testing
- Smoke & Sanity Testing, Exploratory Testing
- Test Case Design, Test Scenario Creation, Test Data Preparation
- Boundary Value Analysis, Equivalence Partitioning

Automation Testing:

- UI Automation for Web Applications
- Regression Test Automation
- Page Object Model (POM) – basic understanding
- Test Execution, Script Maintenance, Result Analysis
- Playwright

API & Backend Testing:

- REST & SOAP API Testing
- Postman, SOAP UI
- JSON & XML validation
- HTTP status codes, headers, parameters, authentication
- SQL queries for backend data validation

Defect & Test Management:

- Defect Logging & Tracking (JIRA)
- Defect Lifecycle Management
- Priority & Severity Classification
- Root Cause Analysis
- Requirement Traceability Matrix (RTM)

Tools & Methodologies:

- JIRA, Postman, Git
 - Agile Scrum, SDLC, STLC, Waterfall
-

Professional Experience

Capgemini Technology Services — Software Engineer QA

Bangalore, India | Sep 2022 – Present

- Executed 5000+ manual test cases for web applications, identifying critical defects and reducing production issues.
- Designed and executed functional, regression, smoke, and exploratory test cases based

on business requirements and user stories.

- Performed UI automation testing using Playwright with JavaScript, automating key regression scenarios to improve test execution efficiency.
 - Developed and maintained Playwright automation scripts for critical user workflows using reusable components.
 - Conducted REST and API testing using Postman, validating JSON/XML payloads, headers, parameters, and status codes.
 - Performed backend data validation using SQL, ensuring data accuracy and business rule compliance.
 - Logged, tracked, and managed 1000+ defects using JIRA, handling the complete defect lifecycle from identification to closure.
 - Actively participated in Agile Scrum ceremonies including sprint planning, daily stand-ups, reviews, and retrospectives.
 - Collaborated closely with developers, business analysts, and product owners to clarify requirements and resolve defects efficiently.
 - Prepared test execution reports, defect metrics, and quality dashboards to communicate testing status and release readiness.
 - Documented and maintained reusable test cases and reports, increasing QA onboarding speed and regression suite reusability
-

Education

Bachelor of Science

Aditya University – Kakinada Nov 2022

Certifications

- Selenium with Java – Automation Testing (Udemy, 2024)
- REST API Testing with Postman (Udemy, 2024)
