

Lakshmi Sree Kella

Software Engineer QA

9390082224

kellalakshmisree@gmail.com Bengaluru

SUMMARY

QA Engineer with 3+ years of experience in Manual, API, and Automation Testing for web-based applications in Agile environments. Experienced in end-to-end testing, release validation, regression testing, defect management, API testing, SQL validation, and quality reporting. Skilled in creating detailed test plans, test scenarios, and executing functional, smoke, sanity, integration, and UAT testing across multiple releases. Hands-on exposure to low-code automation tools, Playwright automation, Postman API testing, and CI/CD-based testing workflows. Strong understanding of SDLC, STLC, defect lifecycle management, and QA best practices.

SKILLS

Manual Testing: Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Integration Testing, System Testing, UAT, End-to-End Testing, Black Box Testing, White Box Testing

Automation Testing: Playwright, Selenium WebDriver, Low-Code/No-Code Automation Exposure

API Testing: Postman, SOAP UI, Swagger, REST API Validation

Performance Testing: JMeter (Basic Knowledge)

Programming Languages: Java, JavaScript

Frameworks & Methodologies: TestNG, BDD, Cucumber, POM, Hybrid Framework, Agile Scrum

Database Testing: SQL, MySQL

Defect & Test Management Tools: Jira, Azure DevOps (Basic Exposure), Test Case Management

CI/CD & Version Control: Jenkins, Git, GitHub

QA Activities: Test Planning, Test Case Design, Defect Tracking, QA Metrics Reporting, Release Validation, Requirement Traceability

WORK EXPERIENCE

E-Commerce Web Application Automation Testing

QA Automation Engineer

📅 01/2024 - Present 📍 Bengaluru

- **Technologies:** Selenium WebDriver, Java, TestNG, Maven, Jenkins, Git, Page Object Model (POM)

Project Description & Responsibilities:

- Developed and maintained automation test scripts for an e-commerce web application covering Login, Product Search, Cart, Checkout, and Payment modules.
- Designed a scalable automation framework using Selenium WebDriver with Java and TestNG following the Page Object Model (POM) design pattern.
- Executed regression, smoke, and sanity test suites through Jenkins CI/CD pipelines for every build deployment.
- Performed cross-browser testing on Chrome, Firefox, and Edge to ensure application compatibility and stability.
- Integrated automation scripts with Maven and generated detailed execution reports using TestNG reports.
- Collaborated with developers and business analysts to identify defects, track issues, and validate bug fixes.
- Reduced manual testing effort by automating repetitive test cases, improving overall test coverage and release quality.

Banking Application Functional & Manual Testing

Manual Test Engineer

📅 09/2022 - 12/2023 📍 Bengaluru

- **Technologies:** Jira, SQL, Agile Methodology, Excel, Test Case Management, Postman

Project Description & Responsibilities:

- Performed functional and regression testing for banking modules including Account Management, Fund Transfer, Transaction Processing, and Loan Services.
 - Validated business workflows and backend data using SQL queries.
 - Created reusable test scenarios and detailed test cases aligned with business requirements and acceptance criteria.
 - Conducted API validation testing using Postman.
 - Supported release testing and production issue verification activities.
-

Professional Experience

Capgemini Technology Services — *Software Engineer QA*

Bangalore, India | Sep 2022 – Present

- Executed end-to-end manual testing activities across multiple application releases ensuring product quality and release readiness.
- Designed, reviewed, and maintained detailed test cases, test scenarios, and test execution reports based on business and functional requirements.
- Performed Release Testing, Regression Testing, Smoke Testing, Sanity Testing, Integration Testing, and User Acceptance Testing (UAT).
- Conducted Black Box Testing and White Box Testing to validate application functionality, workflows, and backend logic. Validated APIs using Postman by testing request/response payloads, headers, authentication, status codes, and error handling scenarios.
- Performed backend database validation using SQL queries to ensure data consistency, integrity, and business rule validation. Identified, logged, tracked, prioritized, and validated defects using Jira throughout the complete defect lifecycle.
- Executed exploratory and edge-case testing to improve application stability and reduce production defects.
- Participated in release validation activities, production hotfix verification, and post-release testing support.
- Prepared QA metrics and reports including defect tracking, test execution status, release quality indicators, and test coverage reports.
- Collaborated with developers, business analysts, and product owners to analyze requirements, clarify defects, and improve overall product quality.
- Contributed to automation initiatives using Playwright to automate repetitive regression testing scenarios and improve test efficiency.
- Participated actively in Agile Scrum ceremonies including sprint planning, daily stand-ups, sprint reviews, and retrospectives.
- Ensured adherence to QA standards, testing processes, and quality best practices throughout the software testing lifecycle.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

Aditya Degree College Kakinada

Affiliated to Adikavi University Rajahmundry

Graduated: 2022

CERTIFICATIONS

-
- Selenium with Java – Automation Testing (Udemy, 2024)
 - REST API Testing with Postman (Udemy, 2024)
 - Microsoft Certified: Azure Fundamentals (AZ-900)
 - Microsoft Certified: Azure Administrator Associate (Az-104)
