

Lakshmi Sree Kella

Software Engineer QA

9390082224

kellalakshmisree@gmail.com Bengaluru

SUMMARY

QA Engineer with 3+ years of experience in manual testing, API testing, regression testing, and web application testing in Agile/Scrum environments. Strong expertise in test planning, test case design, exploratory testing, defect tracking, API validation, and root cause analysis for enterprise applications. Hands-on experience performing REST API testing using Postman, SQL backend validation, debugging issues through logs and network analysis, and executing structured regression cycles. Experienced in collaborating with engineering, product, and cross-functional teams to ensure high-quality releases and seamless customer experiences. Proficient in JIRA, Playwright, SDLC, STLC, and SaaS application quality assurance

SKILLS

Manual & QA Testing: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Exploratory Testing, End-to-End Testing, Integration Testing, Test Planning, Test Strategy, Test Case Design, Root Cause Analysis, Requirement Validation, Defect Reproduction

API & Backend Testing: REST API Testing, Postman, SOAP UI, RESTful APIs, HTTP Methods, Authentication Testing, JSON/XML Validation, Request/Response Validation, Error Handling Testing, SQL, MySQL, Backend Data Validation

Debugging & Defect Management: JIRA, Defect Tracking, Defect Lifecycle Management, Bug Reporting, Issue Triage, Log Analysis, Root Cause Analysis

Automation & Tools: Playwright, Selenium WebDriver, UI Automation, CI/CD (Basic Exposure), Git, Hub

Methodologies: SDLC, STLC, Agile Scrum, Sprint Planning, Release Testing

Programming: Java, C

WORK EXPERIENCE

E-Commerce Web Application Automation Testing

QA Engineer

01/2024 - Present Bengaluru

- **Technologies:** Selenium WebDriver, Java, TestNG, Maven, Jenkins, Git, Page Object Model (POM), Maven, cucumber

Project Description & Responsibilities:

- Developed and maintained automation test scripts using Selenium WebDriver with Java and TestNG for critical e-commerce modules including Login, Product Search, Cart, Checkout, and Payments.
- Designed and implemented a scalable automation framework using Selenium, Java, TestNG, and Page Object Model (POM) to improve automation maintainability.
- Created, executed, and maintained automation test suites for functional, regression, smoke, and sanity testing to ensure release quality.
- Integrated automation test execution with Jenkins CI/CD pipelines for continuous quality validation.
- Collaborated with developers, business analysts, and QA teams to analyze requirements, validate fixes, and improve product quality.
- Identified, logged, and tracked defects using JIRA, ensuring timely defect resolution and retesting.
- Improved automation coverage and reduced manual effort by automating repetitive business-critical workflows.

Banking Application Functional & Manual Testing

Manual Test Engineer

09/2022 - 12/2023 Bengaluru

- **Technologies:** Jira, SQL, Agile Methodology, Excel, Test Case Management, Postman

Project Description & Responsibilities:

- Performed manual and end-to-end testing for banking workflows based on business requirements and user stories.
- Created and maintained test scenarios, test cases, test plans, and QA documentation aligned with acceptance criteria.
- Conducted functional, integration, system, regression, and UAT testing to ensure release quality.
- Validated backend data using SQL queries and collaborated with developers to troubleshoot issues.
- Performed functional and end-to-end testing for banking workflows including Account Management, Fund Transfer, Loan Processing, and Transactions.
- Validated business-critical workflows, ensuring compliance with functional requirements and quality standards.
- Executed manual and exploratory testing for banking workflows involving transactions, account management, and loan processing.
- Created test plans, test scenarios, and regression packs ensuring complete functional coverage.
- Conducted API validations and backend database verification using SQL queries to ensure business data consistency.
- Collaborated with developers to reproduce issues, validate fixes, and improve release quality.

Professional Experience

Capgemini Technology Services — *Software Engineer QA*

Bangalore, India | Sep 2022 – Present

- Owned manual testing efforts across new features, regression cycles, exploratory testing sessions, and release validation for enterprise web applications.
- Designed and executed comprehensive test plans, test scenarios, and structured test cases based on business requirements and functional specifications.
- Conducted deep API testing using Postman, validating REST API authentication, status/response behavior, responses, payload structures, edge cases, and error handling.
- Performed functional, regression, smoke, sanity, and exploratory testing to ensure high-quality product releases.
- Investigated issues through debugging, log analysis, SQL validation, and root cause analysis, providing developers with precise, reproducible bug reports.
- Logged, prioritized, tracked, and verified defects using JIRA, collaborating with engineering teams for timely resolution.
- Collaborated closely with Engineering, Product, and QA teams during sprint planning, requirement reviews, testing discussions, and release cycles.
- Maintained test environments, QA documentation, execution reports, and reusable regression test suites.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

Aditya Degree College Kakinada

Affiliated to Adikavi University Rajahmundry

Graduated: 2022

CERTIFICATIONS

-
- Selenium with Java – Automation Testing (Udemy, 2024)
 - REST API Testing with Postman (Udemy, 2024)
 - Microsoft Certified: Azure Fundamentals (AZ-900)
 - Microsoft Certified: Azure Administrator Associate (AZ-104)
